Front Page Editorial

POLITICAL EDUCATION FOR HALIBURTON COUNTY?

With the possibility of Politics intergrating education, the children of Haliburton County could face an education standstill.

For those who are not aware of the recent legislation, the entire County of Haliburton will be under the jurisdiction of one school board as of January 1st 1969.

This board will consist of fourteen members who will be elected in the following ratios — Stanhope 2, Snowden 1, Lutterworth 1, Dysart 3, Minden 2, Sherborne 1, Cardiff 1, Monmouth 1, Glamorgan 1 District of Bicroft 1.

A Director of education will be appointed by this elected Board, and by this Board only, on or before the 1st day of August 1, 1969. No other group or groups of people have this right. The appointed Director of Education shall hold qualifications according to the regulations, and to this date these qualifications have not yet been made public.

At the moment, an Interim School Organization Committee has been set up with one representative from each existing public and secondary school board. If necessary, sub-committees, consisting of other trustees officials or parents may be established to perform specific duties.

The function of the I.S.O.C. is to prepare a report, regarding the systems of the existing school boards. This would include salary schedules, number of teachers and pupils, existing facilities, bus transport, grants, finances and the internal workings of each school. This report is intended to serve as a smoothover document, on which the new elected Trustees, may or may not base their decisions. This Committee may also submit a guide for administration, such as place to meet and in what area, and supervisory activities. Again, the elected trustees may or may not accept these ideas, thus the purpose of the I.S.O.C. is to facilitate a smooth transition of the essential services from the existing boards to the newly elected trustees.

There are two types of Politicians in this world; firstly, the Politician who wishes self esteem, and what is in politics for him, and secondly, the politician who gives of himself so all may benefit.

It is therefore essential that the newly elected School Board Trustees resemble the second politician for educational progress in Haliburton County.

ROTARY CLUB TO SPONSOR TRIP TO PETERBORO — SEE LEAFS IN ACTION

The Minden Rotary Club will sponsor a trip to Peterboro Memorial Centre on Sunday, September 22nd, to see an exhibition game between the Toronto Maple Leafs and the Rochester Americans.

This trip will be for kids 6 to 16 years of age, if anyone, especially those in the Minor Hockey Association are interested

school. The number of interested persons must be known by Tuesday September 17th, so arrangements can be made in Peterborough.

The cost to each person will involve the admission into the Memorial Centre only, which is \$1.00 per person. The cost of the bus will be donated by the Rotary Club.

Aerodrome Opening A Big Success

In excess of 1500 people gathered on Sunday September 1st at the official opening of the Stanhope Municipal Aerodrome. Three members of parliament were on hand to welcome the many spectators, namely Mr. Wm. Scott, Mr. Glen Hodgson and Mr. John Brown. Other dignitaries who welcomed the people were Mr. Sinclair Nesbitt, Reeve of Stanhope, Mr. Roy Brohm, Reeve of Dysart, Mr. Holley Sission, Deputy Reeve of Dysart, Mr. Mark Vasey, Deputy Reeve of Anson, Hindon and Minden and former county warden, Mr. Lawrence Pritchard.

Over 50 different aircraft visited the new airport with a fine display of home built aircraft being demonstrated by the Experimental Aircraft Association. The big feature of the day was the arrival of a Caribou aircraft from the RCAF base at Trenton. The aircraft has a wing span of 98' and is capable of carrying 30 passengers. It's amazing short

takeoff and landing thrilled

everyone, as this was done in the short distance of 6-700 feet.

Fliers came from many parts of Ontario and the USA. Stayner, Lindsay, Trenton, Brampton, Minden, Stirling, Oshawa, Toronto, Markham, Gravenhurst, Norland, Buffalo NY, Syracuse NY, and Pittsburg PA.

This week the local members of the flying school received their charter as Chapter 312 of the Experimental Aircraft Association. Some of the members are in the process of building their own air-

craft.

The EAA members and the airport committee are planning for another Fly In next year, which will be far bigger and better than this one.

The airport committee wishes to thank everyone for their support in making this event the success it was.

Anyone interested in aviation may find more particulars from President Joe Peacock or any member of the flying school, as there is an opening for more students at present time.

SEE MINNESOTA NORTH STARS IN ACTION SEPTEMBER 18TH.

On Wednesday, September 18, at 8 p.m. the Minnesota North Stars of the NHL will stage an exhibition game for the benefit of the people here in Haliburton. Their opposition will be their minor league club the Memphis South Stars of the CPHL.

All regulars will be on hand, such stars as Cesare Maniago, Mike McMahon, Ray Cullen, Wayne Connelly, Clay Larose, Bill Goldsworthy, Larry Hillman and many others, will be on hand for this exhibition tilt.

Tickets will be on sale at the door only, so come early and get a good seat.

Coach Wren Blair of the North Stars and coach John Muckler of the South Stars are expecting plenty of action, for all players will be out to show their ability in an attempt to make one of the teams.

NHL Referees will also be on hand. The North Stars will be training in Haliburton for ten days, and will make the Haliburton Hockey Haven their headquarters.

ONTARIO HYDRO IN MINDEN RECEIVES AWARD

The Ontario Hydro, through their Regional Office in Barrie, is awarding the Minden Area Office a Safety Plaque for the completion of 1,000 days operation without a lost time accident. This Safety Award is highly thought of and Manager E. L. McCarey of the Minden Office informed us this is the third such Award made to this area. The first Award was April of 1958, the second June of 1962 and the third Award was reached in August of 1968.

The Regional Office located in Barrie is making arrangements for suitable recognition to the Area Staff for achieving this 1,000 day safety record.

\$800 DAMAGE

One person was injured when a car went out of control early Saturday morning near Donald, Ontario and crashed.

Police said Donald Blizzard of Toronto, a passenger in a car driven by William Ferguson, 19, of Toronto, sustained back injuries in the crash.

Damage in the mishap was estimated at \$800.

COMMUNICATIONS

The progress that has been made in the field of communications during the past few years has been remarkable. This progress has certainly been the result of a demand for a reduction in time, money and effort to keep pace with the evergrowing complexity of today's civilization. A recent incident which took place at Balsam Lake Provincial Park, involving human lives, illustrates the advantages of good communications.

On Wednesday, August 14th, a cottager on the shore of Balsam Lake happened to notice by chance a boat flip over in the middle of the lake, approximately one-half mile from shore. The cottager, not having a boat of his own, telephoned the OPP, who in turn called the Park Office of Balsam Lake Provincial Park. This Office called the Beach Patrol Officer at the beach on the inter-com. system, and he immediately took the Department boat to the scene of the accident.

Upon arrival, two persons (U.S. tourists) were found clinging desperately to their small over-turned aluminum boat. The water was very rough, and neither person refused the offer to climb aboard the rescue craft. The elapsed time from start to finish was approximately 15 minutes.

The preceding episode certainly points out how communications if carried out efficiently, can attain the ultimate — save a human life.

Pension Payments Increased In 1969

The maximum of the combined basic Old Age Security pension and the Guaranteed Income Supplement will rise from \$107.10 to \$109.20 a month in January, 1969, it was announced by Health and Welfare Minister John Munro. At the same time, Mr. Munro and Revenue Minister J. P. Cote announced increases in contributions and benefits under the Canada Pension Plan, also effective in January.

The pension increase announcement followed an increase of two per cent in the Pension Index, the maximum allowed by legislation, from 1968 to 1969. The Pension Index reflects increases in the Consumer Price Index.

Old Age Security pensions will increase from \$76.50 to \$78.00 a month. More than 1,500,000 men and women will receive the increase including those whose pensions will start in January when the eligible age will be reduced to 65 years.

In addition, approximately 780,000 old age security pensioners will benefit from the increase in the Guaranteed Income Supplement. The maximum supplement will rise in January from \$30.60 to \$31.20 a month. The combined monthly benefit for those who receive both the old age security pension and the maximum supplement in 1969 will be \$109.20 compared to the current payment of \$107.10.

Maximum pensionable earnings under the Canada Pension Plan, Mr. Cote said, will rise by \$100 from the present \$5,100 to \$5,200.

Maximum yearly contributions by employers and employees will increase from the current \$81.00 to the new figure of \$82.80 each. Maximum annual contributions by self-employed persons will increase from \$162.00 to \$165.60. Canadian employers will receive contribution tables incorporating the changes before the end of this year.

Mr. Munro stated that all retirement pensions being paid under the Canada Pension Plan at the end of 1968 will be increased by two per cent in January 1969. Retirement pensions which become payable for the first time in 1969 will be slightly higher than those which became payable in 1968. On the basis of the new ceiling of \$5,200, maximum full retirement pensions, first payable in 1976, will be increased from \$106.25 a month to \$108.33.

Survivors' benefits became payable for the first time in February, 1968. All such benefits being paid at the end of 1969 will also be increased by two per cent in January 1969. Orphan's benefits and the flat rate components of pensions payable to

widows and disabled widowers will increase from \$25.50 to \$26.01 a month. By the end of 1968, Mr. Munro estimated, some 60,000 Canadians would be receiving monthly retirement pensions and survivors' benefits under the Plan.

The maximum death benefit payable under the Canada Pension Plan for deaths which occur in 1969 will be \$520.

STATES AND ONTARIO TO MEET FOR CONFERENCE ON WATERCRAFT WASTE DISPOSAL

Discussions regarding the compatibility of legislation on watercraft waste disposal between American states bordering on the Great Lakes and the province of Ontario will be given top priority at a special conference to be held in Toronto on Thursday, September 5. Delegates to the conference, being held under the auspices of the Ontario Water Resources Commission, will include representatives from the American states Department of the Interior and the International Joint Commission.

An OWRC regulation that all vessels with sleeping facilities be equipped with toilets and holding tanks takes effect January 1, 1969. All of the states to be represented at the conference have made or are contemplating similar regulations.

In addition to compatibility of legislation, the delegates will discuss implementation policies the enforcement of boat and vessel pollution control regulations and reciprocal arrangements. Special technical problems such as standardization of fittings for pump-out facilities will also be given consideration during the conference. The discussions will be followed by a summary during which recommendations for future action will be made.

The conference—to be chaired by OWRC general manager D. S. Caverly—will take place at the Constellation Hotel.

PRETTY MISS

Anne Murray, the 22-year-old singing sensation of the Maritimes, prefers to carve her career in Halifax where she enjoys being "a little frog in a little pond" but television studios in Montreal and Toronto are wooing her nevertheless. In the past year, Anne has been a regular on two CBC Halifax productions, Let's Go and Singalong Jubilee as well as being the star of CBC Sounds '68 in December and again for four consecutive programs in April.

DOLLARS AND GOOD SENSE

by William J. Martin

Dear Sir: Budgeting is for the birds! I've been trying to set up a family budget like you say, but it just doesn't work. No matter how much twisting and shifting around I do, I still have more monthly payments than I can handle. I'll just go back to the old way of paying as many creditors as I can each month and letting the rest wait for their money. I recommend this approach to your readers.

Call Me John

Budgeting may be for the birds, John, but it definitely is not a cure-all for someone who thinks he can go on a buying spree and then solve all his payment problems with a budget. This is irresponsibility at its worst, but this attitude on your part does not surprise me considering your attitude toward paying your bills.

I wonder what you would think if your boss took the attitude that would pay only a certain group of his employees on payday and let the rest of them wait for their money, especially if you were in the second group.

Budgeting is a tool designed to help people regulate their spending in such a way as to

get maximum satisfaction out of it, and in the process keep out of financial difficulties. There is nothing magic about it; thus, there is no way it can stretch an inelastic income to cover the purchase of things you shouldn't have purchased in the first place.

If I really thought you were interested in getting yourself out of the mess you've gotten into, I would suggest that you (a) contact your creditors and ask them to work with you until you get back on an even keel; (b) at least investigate the possibility of consolidating your debts so you can meet a realistic payment schedule, and (c) stay out of the stores until you've paid your bills. The advice is free, John, but I'm not sure you will want to take it.

GOVERNMENT TO PAY HALF

The Federal government is paying half the cost of converting coin-operated vending machines from silver to the new nickel coinage (quarters and dimes), reports Canadian Hotel & Restaurant. There are 500,000 machines to be converted at \$16 each across Canada, so Ottawa's share will be about \$4 million. The problem arose when the federal government announced the switch from a silver-copper alloy to all-nickel coins. The switch to all-nickel coins means an increased seignorage revenue for the Royal Canadian Mint because it costs less to manufacture the new coins but the selling price will be used to pay the government's share of converting the machines. Makers of the new coin selection mechanisms, says Canadian Hotel & Restaurant, enclose forms on which owners apply for the 50 percent rebate.

AIR POLLUTING ASH

A \$1.5 million pilot plant will be built next to the Ontario Hydro Lakeview steam generating plant in Toronto to make waste fly ash into lightweight aggregate and other concrete products for the construction industry, reports Heavy Construction News. Enercon Ltd. of Toronto hopes to switch its 150,000-tons-a-year pilot plant into commercial production next year and eventually process 400,000 tons of ash recovered each year at the adjacent power plant. Similar recovery plants may be built to process ash from other thermal stations under the agreement between Enercon and Ontario Hydro.

RETAILERS UNITE

A scheme to "blow the whistle" on phony cheques and counterfeit money is expected to help Sault Ste. Marie's business community in reducing losses reports Style.

About 130 business firms are participating in the plan, devised by the Chamber of Commerce. Retailers can be alerted in 20 minutes against bouncy cheques and home-made money.

A retailer presented with a phony cheque or bill makes his complaint immediately to the city police. After investigation, the police department telephones the information to the chamber office.

The staff at the chamber office calls 10 business firms, relaying the information. Each of these firms then relays the call to five other firms. In turn, these firms each call one or two others.

ALL TOGETHER NOW!

Greater enjoyment and benefit can be gained from activity which is performed with one or more people. Involve your whole family in exercise, sports and games.

SNOWMOBILES TO BE LICENCED

A new act, passed by the Ontario Legislature, will require the licencing of Snowmobiles.

The new Motorized Snow Vehicles Act, 1968, is expected to go into effect January 1, 1969.

The Act will require snowmobiles to be registered with the Department of Transport and have a licence plate on the front. It also provides that municipal councils may pass bylaw prohibiting the driving of snowmobiles along or across highways within their boundaries.

Where snowmobiles are permitted to travel along or across highways, persons under 16 years of age are prohibited by the Act from operating snowmobiles on or near highways and the vehicles must be insured. Proof of insurance must be produced on the request of a police officer and anyone who fails to produce proof that the vehicle is insured is liable to a fine of \$50 to \$500.

The Act further provides that if a snowmobile is sold, the Department of Transport must be notified within six days of a change of ownership. They must also be notified within six days of any change of address of the registered owner of the snowmobile.

TOWNSHIP OF SNOWDEN

Applications will be received up to September 23, 1968 for the position of road maintenance truck driver. Please state qualifications and experience to:

Sidney Jennings, Clerk,
Township Of Snowden
RR1 Minden Ontario

NEW IDEAS TO SAVE YOUR LIFE ARE COMING

New ideas for life saving crash barriers that may injure a car a little but will not hurt you are on the way.

They are being jointly studied now by the public service division of British Motor Holdings and other motor firms, car designers and highway engineers.

Because research scientists in Britain and North America have found that some types of barriers previously thought to be safe are, in fact, hazardous.

About 15 countries, including Britain, the U.S., France and Japan, are now studying an international report showing that hundreds of miles of crash barriers should be replaced.

In Britain the Institution of Mechanical Engineers, to which many BMH designers belong, have organized a special two day conference to tell motor chiefs and the high engineers that:

CONCRETE curbs and low concrete guardrails are a hazard to vehicles that strike them too severely.

BARRIERS with corrugated

guardrails bolted directly to strong posts are unsatisfactory for high speed impacts.

Road research scientists in Britain have found that crash barriers can be improved by setting guardrails about a foot away from the posts, so that they act like buffers. They also say guardrails should be high enough to prevent cars from rolling over them.

Most of all though, posts should have flexible bases, or the posts themselves should be flexible, to absorb more impact and to stop strips of guardrails from being torn off.

Newest suggestion of all, though, is for a "rubbing rail" like those round the edge of a Dodge'em rink, to take the initial impact in the crash.

But a firm in Essex, Britain, claims to have developed an entirely new and inexpensive crash barrier that will cause little more than superficial damage to a car, even when it hits the barrier at 70 mph. "It will not do much more than score the paint," they say.

Film of a demonstration, conducted at Britain's Ministry of Transport Controlled Road Research Laboratory, is to be shown to highway chiefs "on request".

**RED CROSS

WITH YOUR HELP**

NOTICE

Men's Commercial Bowling League will commence bowling, Wednesday September 18th at 7 P.M.

Any bowlers interested be at the Minden Bowl at above time.

COHOES AND RAINBOWS CAN BE CONFUSED

A coho salmon was recently captured in the Canadian waters of eastern Lake Ontario. This was the first verified recapture on the Ontario side from the experimental planting of 25,000 yearling cohoes made by the New York State Conservation Dept. last spring.

In the early stages of this work at least, New York State fishery workers are anxious to examine as many of these fish as possible and would like at least to record the total catch. Specimens may be turned in or reported to your local Conservation Officer, or transmitted to the Glenora Fisheries Station of the Department of Lands and Forests at Picton.

Coho salmon may be confused with rainbow trout, which appear to be particularly abundant in Lake Ontario this year. Rainbows are very silvery and salmon-like during their time in the lake waters. Pacific salmon in general have anal fins (the single fin on the belly near the tail) which are longer along the base than is the case with the trout. Trout usually have fewer than 12 rays in this fin, while the salmon generally have more. Rainbow trout have a spotted tail with a shallow notch, while the salmon have few spots and deeply notched tails. The tail base is also noticeably thicker in rainbow trout. Department Biologists and Conservation Officers will be pleased to make identifications where the fisherman is in doubt.

A. E. Walroth
District Forester

SPORTS WITH BOB BEENEY

Well, here we are once again — back in the fold. I might say it is good to be back with the pen in hand.

We had a good summer keeping busy with Don Campbell in the contracting business and of course our cottages on Gull Lake is a big job as well. However, now we are looking forward to a little free time and the up and coming hockey season.

Over the summer months I was given the job of President of the Minor Hockey Association, (thanks alot friends). I have a good executive in Ray Miller vice-pres., Keith Brown secretary, and ye old editor Al Greir as treasurer, the coaches and managers of course are a great help as well. Our first meeting gets underway tonight, so we will have a little news on the coming season for you next week.

Just taking a look at the Minor Hockey situation right now, I am sure we will have many more boys playing this year. The Association has certainly grown over the past few years, and we can proudly say the hockey given the boys in this community is second to none.

A reminder to the players who wish to see the Toronto Maple Leafs in action on Sunday September 22nd, in Peterborough at the Memorial Centre, just notify your teacher at school. This evening of entertainment comes to you for a small admittance of \$1.00, the transportation will be by bus, donated through the Minden Rotary Club. A limited number will be going, so get your name in now. You will see the Leafs in action against their farm club the Rochester Americans of the American League.

HOCKEY IN HALIBURTON

There has been plenty of hockey action this week in Haliburton. Ab LaRue "Mr. Hockey" in that community has been having nightly workouts for both Intermediate and Juniors. Ab will be sponsoring both teams this year in competition. The Intermediates will be playing in "C" calibre, along with the Junior Club as well.

We must take our hats off to this gentleman, for without his interest, hockey just might die altogether in this area. It can be said that hockey has already died in Minden except for Minor teams, since we have no artificial ice.

Both of these teams should prove interesting this winter, for many of the Minden players will be on the teams. It is hoped that Ab has a successful season.

This past week the referees have taken over the Haliburton arena, this is the NHL school conducted by Vern Buffy. They have been staying at the Hockey Haven, with daily work-outs in the arena.

Next week the Minnesota North Stars of the NHL will hit training camp. They have a game lined up with the Memphis South Stars on Wednesday September 18th. Tickets will be on sale at the door only.

This should be a must game for all hockey fans, you will see stars in action such as Cesure Maniago, Mike McMahon, Ray Cullen, Wayne Connelly, Claud Larose, Bill Goldsworthy, Larry Hillman and many others. Wren Blair will be on hand as coach of the North Stars while John Muckler will be behind the bench of the South Stars.

The teams will be arriving in Haliburton on September 14th and will train for 10 days before hitting the exhibition trail.

PREVENT CROOKED TEETH

One common reason for a new permanent tooth growing in crooked is "the tooth that got away too soon", says the federal health department publication, "Crooked Teeth — Crooked Faces, They Can be prevented."

If a baby tooth decays and is lost or has to be pulled out before the permanent tooth is ready to take its place, the teeth on each side of the space where it was will tip over toward each other, closing the space. When the permanent tooth does try to come through, the space that it should have is already occupied, and it has to twist and shift out of line in order to find room for itself.

This kind of crooked tooth is easy to prevent. First, the number of cavities can be greatly reduced by teaching the very young child to brush his teeth immediately after eating, and by seeing that he doesn't eat candy and sweet food too often.

Secondly, have the child's baby teeth cared for by a dentist from the age of three — then tiny cavities can be filled before they destroy the tooth to the point where it has to come out.

Thirdly, if a tooth is lost too soon, the dentist can put a "space maintainer" between the remaining teeth to hold the space for the permanent tooth.

ABOUT THE TOWN

With Jeanne Sears

The librarian at this village had a very busy summer with the visitors many of whom borrowed books for the first time and were very pleased with the selection available. Circulation amounted to more than an average of thirty an hour. Workshops will be informative, as she plans to attend one at the County Office this week and also a two day session at Gananoque next week. The exchange of books is also this week giving a new selection of fine reading. With so many poor shows on television, it is gratifying that so many books are used. If you haven't been in, come over and see what suits you. This service is one paid by your taxes so make use of it.

* * * *

Lindsay Central Exhibition will be soon on; some of our amateur talent which proved so excellent at our own fair should enter. This gives entertainers experience and at times leads them on to new fields. Don't forget you can't win if you don't try.

* * * *

Some students who have completed their courses at the District High School will soon be away furthering their education. Some of those are Bonnie Lee Prentice, Don Hyde and Gerald Kylie at Waterloo Lutheran, Gordon Graham at Western, Craig Morrison at Brock, St. Catharines, and Dorothy McCracken, Cathy Berry and Dianne Earle at Peterborough Teachers College. It is gratifying that so many from our village may complete their education and qualify for university or secure fine employment.

* * * *

If you save bread crusts like I do, put in the oven after baking is done while the oven cools and then you can roll into crumbs useful in so many ways. These can be stored in an air tight jar ready for use.

* * * *

Then there was the youngster who wanted to be a lion and scare everybody. When asked if he would scare his teacher he replied. "Heck no, nothing would scare her."

* * * *

Being one of the crowd watching the fast ball games we were pleased at our team winning. However it would be an improvement if something would be done about the dust flying, perhaps a new location would be an improvement.

* * * *

Mr. and Mrs. Gerald Finlay have just returned after spending their holiday at Churchill Manitoba, visiting their daughter and family Mr. and Mrs. Victor McKay.

* * * *

Other persons away at time of writing are Mr. and Mrs. J. O. Jackson at Hamilton where Jean is attending Registrars Convention.

* * * *

Holidaying in the states also were the Rev. Wesley Oak and family who report having a happy time.

* * * *

The Chil family of Toronto held their family Re-union at Deep Bay on September 7th. Mrs. Chillman, her eleven married daughters and their children were among fifty who attended. Special features of the day were an all-day horse shoe pitching contest and fireworks over the lake. Three members of this family enjoy the summers at their cottages.

* * * *

Weather at the moment looks nice, but, more showers to come, at least we haven't had too much frost yet. Cheerio until next time.

ENROLMENT GOOD, BUT STILL ROOM FOR MORE

Sir Sandford Fleming officials are concerned that the College's "healthy" registration rate for next year's full-time programs has discouraged potential students who mistakenly believe all programs are filled.

"A variety of programs are still open for registration in our applied arts, business and technical divisions," said College Dean George H. Robertson, "although students should apply quickly since classes begin the second week in September."

Mr. Robertson said it is true the early childhood education, forestry and social welfare programs are filled, but added there are 16 other choices still open to applicants.

Mr. Robertson also said that while a recent announcement concerning possible cancellation next year of the two-year electrical and mechanical technician programs at the College still is a possibility, students already enrolled in these areas, and those who enter this year, will be allowed to complete their programs and graduate with their diplomas.

In addition, enrolment in these programs is showing improvement. "We certainly did not mean to create any false impressions concerning enrolment possibilities, but, if this has happened, we want to do everything possible to set the record straight," he said.

Generally, registration at Sir Sandford Fleming is up to predictions with approximately 700 students, including 150 taking forestry at the College's Lindsay campus.

However, more students can be accommodated at Peterborough in home economics, business administration, general business, and secretarial programs, as well as in construction, electrical, electronic and mechanical technician areas, and in the three-year civil and electro-mechanical engineering technology programs.

SITTERS!

Fire protection ground rules for parent and baby-sitter:

- Sitter has sense of responsibility, likes children, preferably lives in the neighborhood.
- Instructions in writing: How to reach you; Fire department number.
- Exit locations.
- Furnace or stove operation. Flashlight handy in power failure.
- If there's a fire, get the kids out. Don't wait to dress them.
- Call for help. Say exactly where you are.
- If you can, turn on the front lights to attract attention.
- Don't re-enter the place.

NOBODY ESCAPES THE LOSS

Nobody, the taxpayer least of all, escapes the pocket picker FIRE — on the job and in the home. Shown here is the front of a handy 3 x 5 inch folder which concisely and interestingly sets out the meaning for fire, and ways to avoid fire. Consult your employer about getting a free copy.

MORE PEACE OF MIND

Checking a home, plant or office for hazards does not absolutely guarantee freedom from fire. But it helps — and there is greater peace of mind for the occupants. Know something about the causes of fire, or ask the fire-fighter to help point them out to you.

New Postal Rates

The Honourable Eric Kierans, Postmaster General, announced today a giant step in long range planning to move postal rates and mailing regulations from the traditional pattern to a modern commercial concept. No class of mail will remain unchanged and rates which do not require Parliamentary approval will be revised effective November 1st, 1968.

For years the difference between a third class mail item and a parcel post item was established to a large extent by the intent of the mailer. This system resulted in rates being established on individual rulings rather than on post office handling costs. Now all third and fourth class items of mail if they weigh one pound or less will be handled as third class mail and as parcel post when they weigh over one pound. The administrative work in defining class will be eliminated and the work at the post office wickets and in the mail rooms of industry will be faster and more accurate.

With this change the special delivery and insurance systems which applied to parcel post or fourth class mail will be extended to cover third class.

Included in the third class mail category are addressed and un-addressed circulars and all types of greeting cards, including Christmas cards. The rate changes to these items which are representative of the new rate structure will establish the cost of mailing an addressed circular or a greeting card at 5c for the first two ounces and 3c for each additional two ounces. Unaddressed advertising material will cost 3c for the first two ounces and 1½c for each additional two ounces. The lesser rate for unaddressed mail is based on the actual handling operation which is less than for individually addressed mail. Similarly, a special rate for mailers in quantities of 10,000 or more third class addressed items has been established at 4c for the first two ounces and 3c for each additional two ounces. This special rate is contingent upon the mailer pre-sorting and bundling the mail in accordance with post office requirements.

Parcel post mail will be adjusted only for oversize items where the new handling surcharge will be 75c. Oversize items are those exceeding the established parcel post dimensions and which must receive special handling in the mail stream.

International rates which could be adjusted within the re-structured rate schedule for domestic

mails have also been revised in all areas, including an increase in the air mail letter rate to the United States. The new rate will be 10c an ounce which is the same as the current rate on United States air mail letters addressed to Canada.

Early in the new session of Parliament legislative approval will be sought to increase the postal rates on domestic first class letter mails and on second class mail which is made up of newspapers and magazines. In restructuring the postal rates Mr. Kierans said the philosophy of cost recovery is being followed and as Postmaster General he expects each class of mail and post office service either to pay its own way or accept its fair share of the operating costs of the Canada Post Office.

The revised rates are expected to add 17 million dollars to postal revenues for the remainder of the fiscal year ending March 31, 1969. A schedule of rate changes to be implemented November 1st, 1968, follows.

WOMAN INJURED IN ACCIDENT

A woman sustained chest injuries early Monday morning in a one-car crash near Haliburton which resulted in \$700 damage.

Police said Thelma Baxter, a passenger in a car driven by Walter Baxter, 53, of RR2, Horby was taken to Haliburton Red Cross Hospital after the mishap. Minden OPP Constable Donald Lloyd investigated.

MAN INJURED IN ACCIDENT

A Toronto man was injured Saturday evening when the car he was driving went out of control on Highway 121, near Minden and crashed.

Police said Gordon Treleaven, 40, who sustained chest injuries in the mishap was transferred from the Minden Red Cross Hospital to Toronto General Hospital. Damage in the crash was estimated at \$1,000.

7:00 P.M. Colourful Palomino Class
8:00 P.M. Grandstand Variety Show with Stu Phillips & supporting cast.

Some Whoppers To Beat In Big Fish Contest Conducted By OFA

A 50 pound 12 ounce Maskinonge caught in the St. Lawrence River by Stewart Levere of Cardinal, Ontario, leads this species in the Big Fish Contest conducted by The Ontario Federation of Anglers and Hunters and Molson's Brewery (Ontario) Limited. He has also entered a 38 pound 8 ounce Maskinonge. The record Maskinonge for the contest, now in its tenth year, is 51 pounds caught in 1963. Running second is Dale Harshbarger of Decatur, Illinois with a 40 pounder measuring 54" caught in Lake of the Woods.

In the Lake Trout class Mel Gaare of DeForest, Wisconsin leads with a 39 pound 4 ounce fish measuring 42" which he caught in Crow Lake, Phillip Township. The contest record is 41 pounds caught in 1961.

A Hamilton, Ontario angler, Wayne Kearney tops the Rainbow Trout entries with his 12 pound 8 ounce Rainbow, measur-

ing 29 inches, which he caught trolling in Owen Sound Harbour on opening day. It was a good day for Wayne as he also pulled in five other Rainbow Trout one over 7 pound and another just under 7 pounds.

Scott Graham of Owen Sound has entered the second largest Rainbow Trout, weighing 12 pounds 4 ounces, also caught on opening day in the Pottawatomi River. Anglers will get another chance at the big Rainbows this fall when they will be running up most streams from Bayfield on Lake Huron, around the Bruce Peninsula to Wiarton, Owen Sound and Honey Harbour in Georgian Bay.

A 6 pound 8½ ounce Speckled Trout and a six pound, eight and one quarter ounce Speckled Trout lead in this species. The first caught in Lake Macquon, Township 29, Range XX measuring twenty-five and one quarter inches was entered by Rod Daw-

son of Wawa, Ontario. The second was caught in the Nipigon River by Mrs. Olga Jalkanen of Nipigon, Ontario. This year Lake of the Woods has produced the largest Northern Pike in the contest. Lowell Wentz of Lansing Michigan caught a 24 pound Northern Pike measuring 46½ inches and Darrell Remsing of Milwaukee, Wisconsin a 23 pound 8 ounce Northern Pike.

The east shore of Lake Simcoe has given up the largest Walleye to be entered in the contest to date. Herbert Mowles of Toronto pulled in a 14 pound 9 ounce Walleye measuring thirty-four and three quarter inches. The streams running into the eastern side of Lake Simcoe gave anglers many good sized Walleyes last fall and this is a good area for fall fishing.

A Largemouth Bass weighing 7 pounds, caught in Balsam Lake Goshen Township, leads this species and the Master Angler

is F. C. Colegrave of Rocky River, Ohio. Keith Reinker with a 6 pound 3 ounce Smallmouth Bass caught in Moose Lake, Harrison Township is in the lead and a 6 pound Smallmouth Bass caught in Lenore Lake, Pardell Township by Albert Randler of Fort William is in second place.

The contest has been running since April 27th and will end on November 17th. Anglers who enter fish that meet the minimum weight requirements shown on the entry form are awarded the Master Anglers Badge. In addition there are \$3200.00 in cash awards ranging from \$100.00 to \$10.00 in each of the eight eligible species of fish. Entry forms can be obtained by writing to The Big Fish Contest, Box 309, Willowdale, Ontario.

YOUR ELECTRIC FUSE IS YOUR WATCH DOG

An over-fused electric circuit invites fire in the home. And a national survey shows that hundreds of thousands of Canadian dwellings have the wrong fuse (costing less than a dime) in a socket.

In a typical municipality of 25,000, fire investigators found that only 15% of the homes visited were properly fused.

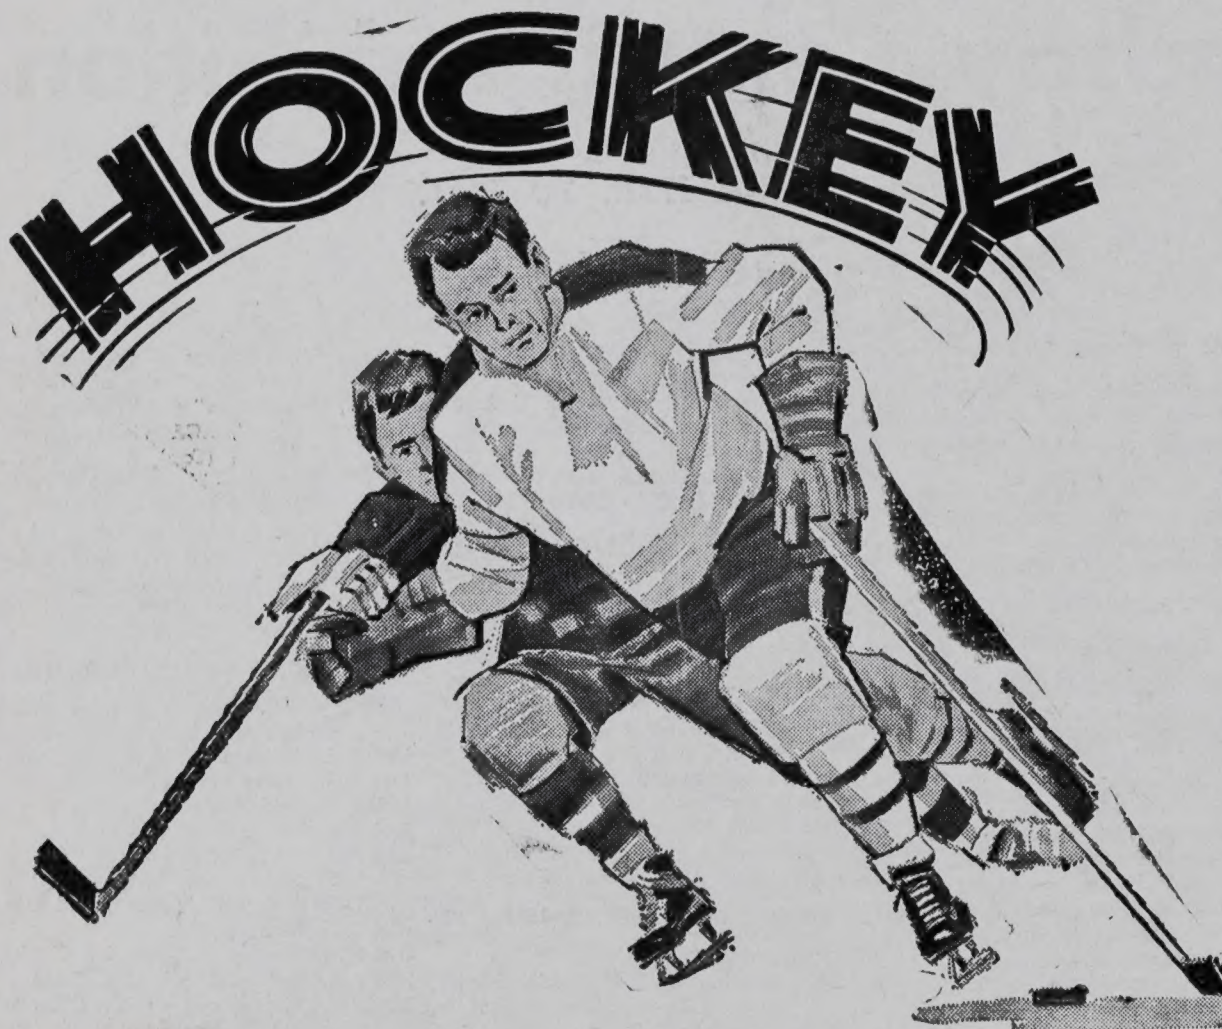

What is over-fusing? It's when you use a 20, 25 or 30 ampere socket fuse in an ordinary branch household circuit.

Why can such fuses provide a fire hazard? Because of false security. They do not "blow" when the "load" is dangerously increased. The wiring heats. Heat plus fuel and oxygen means fire. If the wiring is concealed, fire may start in the wall.
